

APPLICATION:

Measuring the volume of cold potable water passing through the pipeline.

FEATURES:

Removable element for facilitating installation and maintenance.

Hermetically sealed register, magnetic transmission (magnetic coupling)

Totalizer has big and clear numerals, long term clear reading, inter-exchangeable parts, low driving resistance. Reliable sensitive action, small pressure loss, long working life, nice looking etc.

Reed switch signal output is available.

Available in **cubic meter, US gallon and cubic feet** in measuring unit.

Flow Sensor: A small rotating “star” in the center of the dial plate helps to detect even the smallest flow through the meter.

INSTALLATION REQUIREMENTS:

Thoroughly flush the service line upstream of the meter to remove dirt and debris before water meter installation.

Meter shall be full of water at flow measuring.

Install meter in the line with straight pipe 5xDN length at up stream and 3XDN at down stream.

WORKING CONDITION:

Water temperature: ≤40 for cold water meter

≤90 for hot water meter

Water pressure: ≤1Mpa or 1.6Mpa optional
(10bar or 16bar optional)

MAXIMUM PERMISSIBLE ERROR:

In the lower zone from Q_{min} inclusive up to but excluding Q_t is $\pm 5\%$

In the upper zone from Q_t inclusive up to and including Q_s is $\pm 2\%$

NOTE:

Technical data conform to International Standard ISO4064.

MODEL: HOT WATER METER

REMOVABLE ELEMENT WOLTMAN PULSE TRANSMITTING WATER METER

TRANSMITTING COLD WATER METER

TRANSMITTING HOT WATER METER

APPLICATION AND FEATURES

Data cold water meter.

Water meter equipped with a Reed Switch Pulser which can be connected to remote reading systems. The Reed Switch Pulser sends out electric signals per a preset water quantity.

Comes in several model variation, which indicate different pulse rates. To choose the variation best suited to your needs as per below diagram.

REED-SWITCH ELECTRIC DATA

Switch voltage: 24VAC/ DC

Switch current: 0.01A max
